

ANSWERING SERVICE

SECURE TWO-WAY COMMUNICATIONS FOR HEALTHCARE

miSecureMessages simplifies hospital communications to ensure fast, reliable, encrypted communications to help care teams maintain compliance and provide better patient care.

SAVE CRITICAL TIME

miSecureMessages makes it easy for medical staff to communicate quickly and efficiently.

IMPROVE YOUR WORKFLOWS

Enhance the process of patient admissions, sending lab results, transporting patients, and more.

WORKS ON YOUR DEVICES

miSecureMessages apps are available for Android™ and Apple® iOS devices

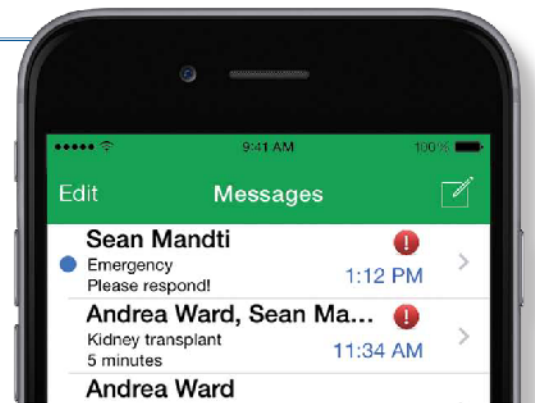

Every business needs to maintain privacy for their clients' and consumers' personal data. For healthcare organizations, securing patient information is required by HIPAA and HITECH regulations. Security, privacy, and speed of accurate message delivery are critical to managing workflows. By encrypting your information, miSecureMessages helps ensure that your data remains confidential.

HIPAA-Compliant Secure Messaging

miSecureMessages is built specifically for healthcare facilities to send and receive real-time secure messages with speed, reliability and HIPAA compliance. Outside teams – or facilities using call centers for receptionist and messaging services – use miSecureMessages to save time, eliminate errors, increase efficiency and improve security of communications.

miSecureMessages replaces outdated paging technology and enables users to send and receive secure encrypted messages from anywhere they have mobile broadband or Wi-Fi coverage.

miSecureMessages is a powerful pager replacement and alerting application built for iPhone®, iPad™ and Android™ mobile devices.

WHY miSECUREMESSAGES?

Increase productivity, reduce errors and eliminate security risks within your organization by replacing outdated pager technology and securely send and receive encrypted text messages, photos, audio, and other media.

Built-in Security Focused on You

The reliable miSecureMessages apps help ensure your messages are HIPAA compliant.

- Encrypting all your messages
- Not storing messages on your devices
- Unique Passcode and Password settings
- Convenient biometric authentication and unlock
- Remote Disabling to prevent access

Messages at a Glance

miSecureMessages speeds communications by keeping your professional messages separate from other texts and messages.

Instantly see messages that:

- are Unread
- set to High Priority
- include Attachments

Convenient Two-Way Messaging

Easily receive and reply to important messages with device-to-device messaging. miSecureMessages streamlines the process:

- Interact with one-person, multiple people, or an entire group
- Speeds your conversations using native Android and iOS apps
- Offers quiet communications – no need for overhead paging

React Faster

Speed your response time with immediate message delivery, including secure text messages with:

- Persistent Alerts – both visual and audio
- Push Notifications
- Great coverage using 3G/4G and WiFi

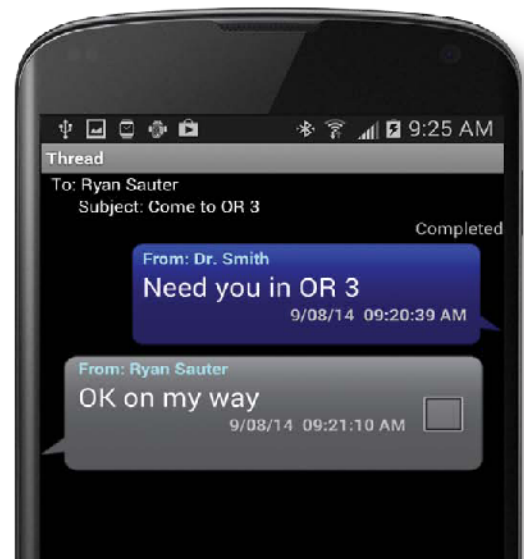

Fast Communications

Using miSecureMessages, you can quickly:

- Type your response
- Speak your response, and it's converted to text for you
- Send a Canned Response with a single touch

You can reply to:

- The entire group
- The person who sent the message
- Someone else in the conversation

POWERFUL. FEATURE-RICH. FUTURE-READY.
